# SOIL & COMPOST

## Safety and recycled materials information

**CUSTOMER INFORMATION SHEET**

BULK SOILS / COMPOSTS / SOIL BLENDS

31 OCTOBER 2026 | VERSION 1.1

Read before handling, spreading or blending Shantana bulk soil products.

## 01 Recycled materials

Our bulk soil products contain recycled or recovered ingredients. Depending on the product, these may include composted green waste, composted food organics and screened recovered soils. Ingredients and proportions vary between products.

## 02 Naturally occurring organisms

Soil and compost contain naturally occurring bacteria, fungi and other microorganisms. Some microorganisms, including Legionella bacteria, can cause illness. Avoid breathing dust or airborne particles when handling these materials.

## 03 Physical fragments

Recycled ingredients may contain small fragments of glass, tile, ceramics, plastic or other foreign material. Sharp edges can cause cuts or puncture wounds. Avoid bare-hand contact. If you find sharp fragments or unexpected debris, stop handling the affected material and contact Shantana.

## 04 Handle safely

1. **Wear protection.** Wear sturdy cut-resistant gloves, enclosed footwear and a properly fitted P2/N95 respirator.
2. **Minimise dust.** Lightly dampen dry material to minimise dust.
3. **Allow ventilation.** Handle outdoors or in a well-ventilated area.
4. **Wash your hands.** Wash hands thoroughly after handling and before eating, drinking or smoking.
5. **Follow product instructions.** Follow any additional product-specific warnings and instructions.

This customer information sheet does not replace applicable product-specific Safety Data Sheets (SDS) or supplier instructions. Contact Shantana for information about a particular product.

Handling guidance: NSW Health - Safe gardening | Australian CDC - Legionellosis
